OUTDOOR COVERINGS

**SECCO**

*Dare to commit...*

## ADVANTAGES

Easy and quick to install

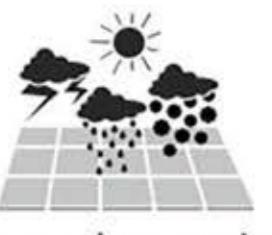

water Drainable

Strong and wear resistant

Frost resistant

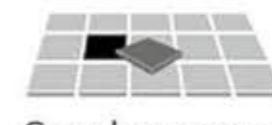

weather resistance

Fire resistant

easy to clean

Can be removed,  
and re-positioned

The 20 mm thick ceramic tile collection (XTREAM 20), combine beauty and high technical performance. The result is an excellent solution for endless outdoor applications.

## APPLICATIONS

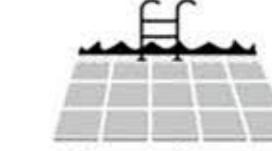

The 20mm thick glazed porcelain tiles is ideal for outdoor flooring in both public and private areas.

Application for Residential areas

Front and Back Yards

swimming pools

balconies and terraces

path ways

gardens

verandas

Application for Public and commercial areas

pools

hotels

driveways

walkways

urban Parks

industrial areas

private beaches

restaurants and bars

**15X30\_6''X12''**

Characterised by a pure and contemporary appearance, the 60×120 floor gives an impression of space, thanks to the reduced number of joints that interrupt the continuity of the surface. This type of floor can be matched with the 60×60 size and is recommended for commercial projects.

**20X20\_8''X8''**

Available in the Outdoor XTREAM 20 version with a thickness of 20 mm, 45×90 tiles have the right proportions for capturing the appearance of prestigious stone and original concrete. They are recommended for all those who appreciate the traditional rectangular size for exteriors.

**15X30\_6''X12''  
Non rectified**

Characterized by a modern aesthetic, the 60×90cm format gives a sense of space and can be combined particularly well with other formats such as 60×60 and 90×90. This type of tile is versatile.

**20X20\_8''X8''  
Non rectified**

Unifying and enlarging spaces: these are the characteristics of a floor covered in 60×60 cm tiles, increasingly common nowadays. 60×60 tiles are proposed with rectified edges and it is possible to lay them with minimum width grout joints and at right angles to walls, to obtain a modern and refined aesthetic.

**Different tile sizes produce a different aesthetic and influence the way you feel in your outdoor spaces, we have wide range of sizes suitable for small or large, modern or contemporary outdoor surfaces**

## LAYING OVER GRAVEL

### INSTALLATION GUIDE:

Create a layer of at least 4 Inches of gravel with a diameter of 1/4" on the existing substrate.

Level of the surface with straightedge and check the flatness.

Place the tile on the gravel and check the gap between them is same over the entire laying surface. Tap down gently with a rubber mallet to settle them in to place and eliminate an unevenness.

Add gravel in joints to level the flooring area. Decorative gravel that is larger in diameter can be used instead of what is used for substrate

## LAYING OVER GRASS

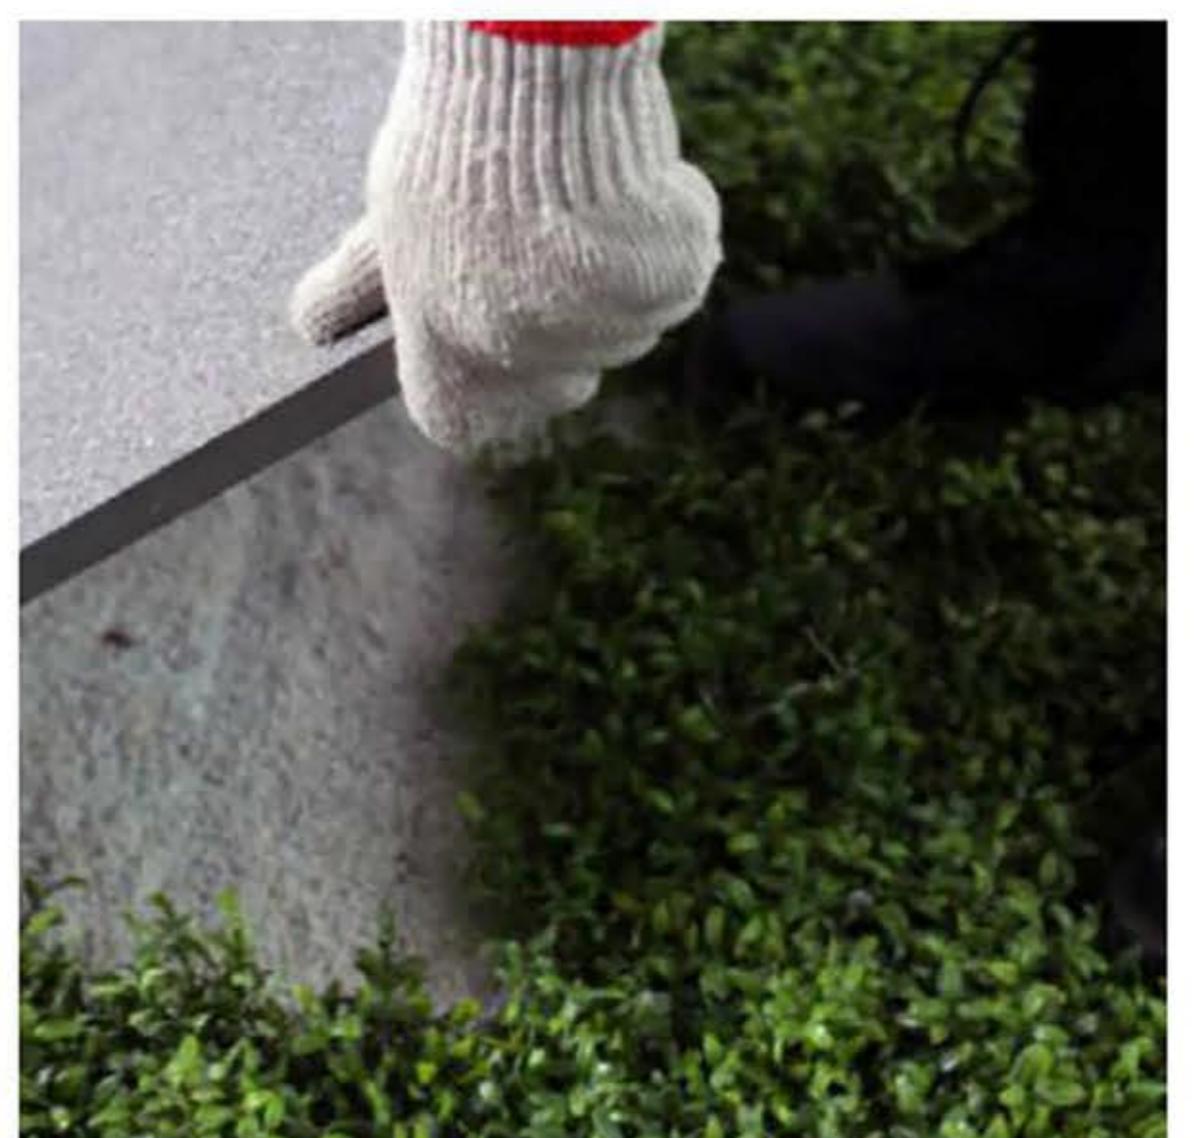

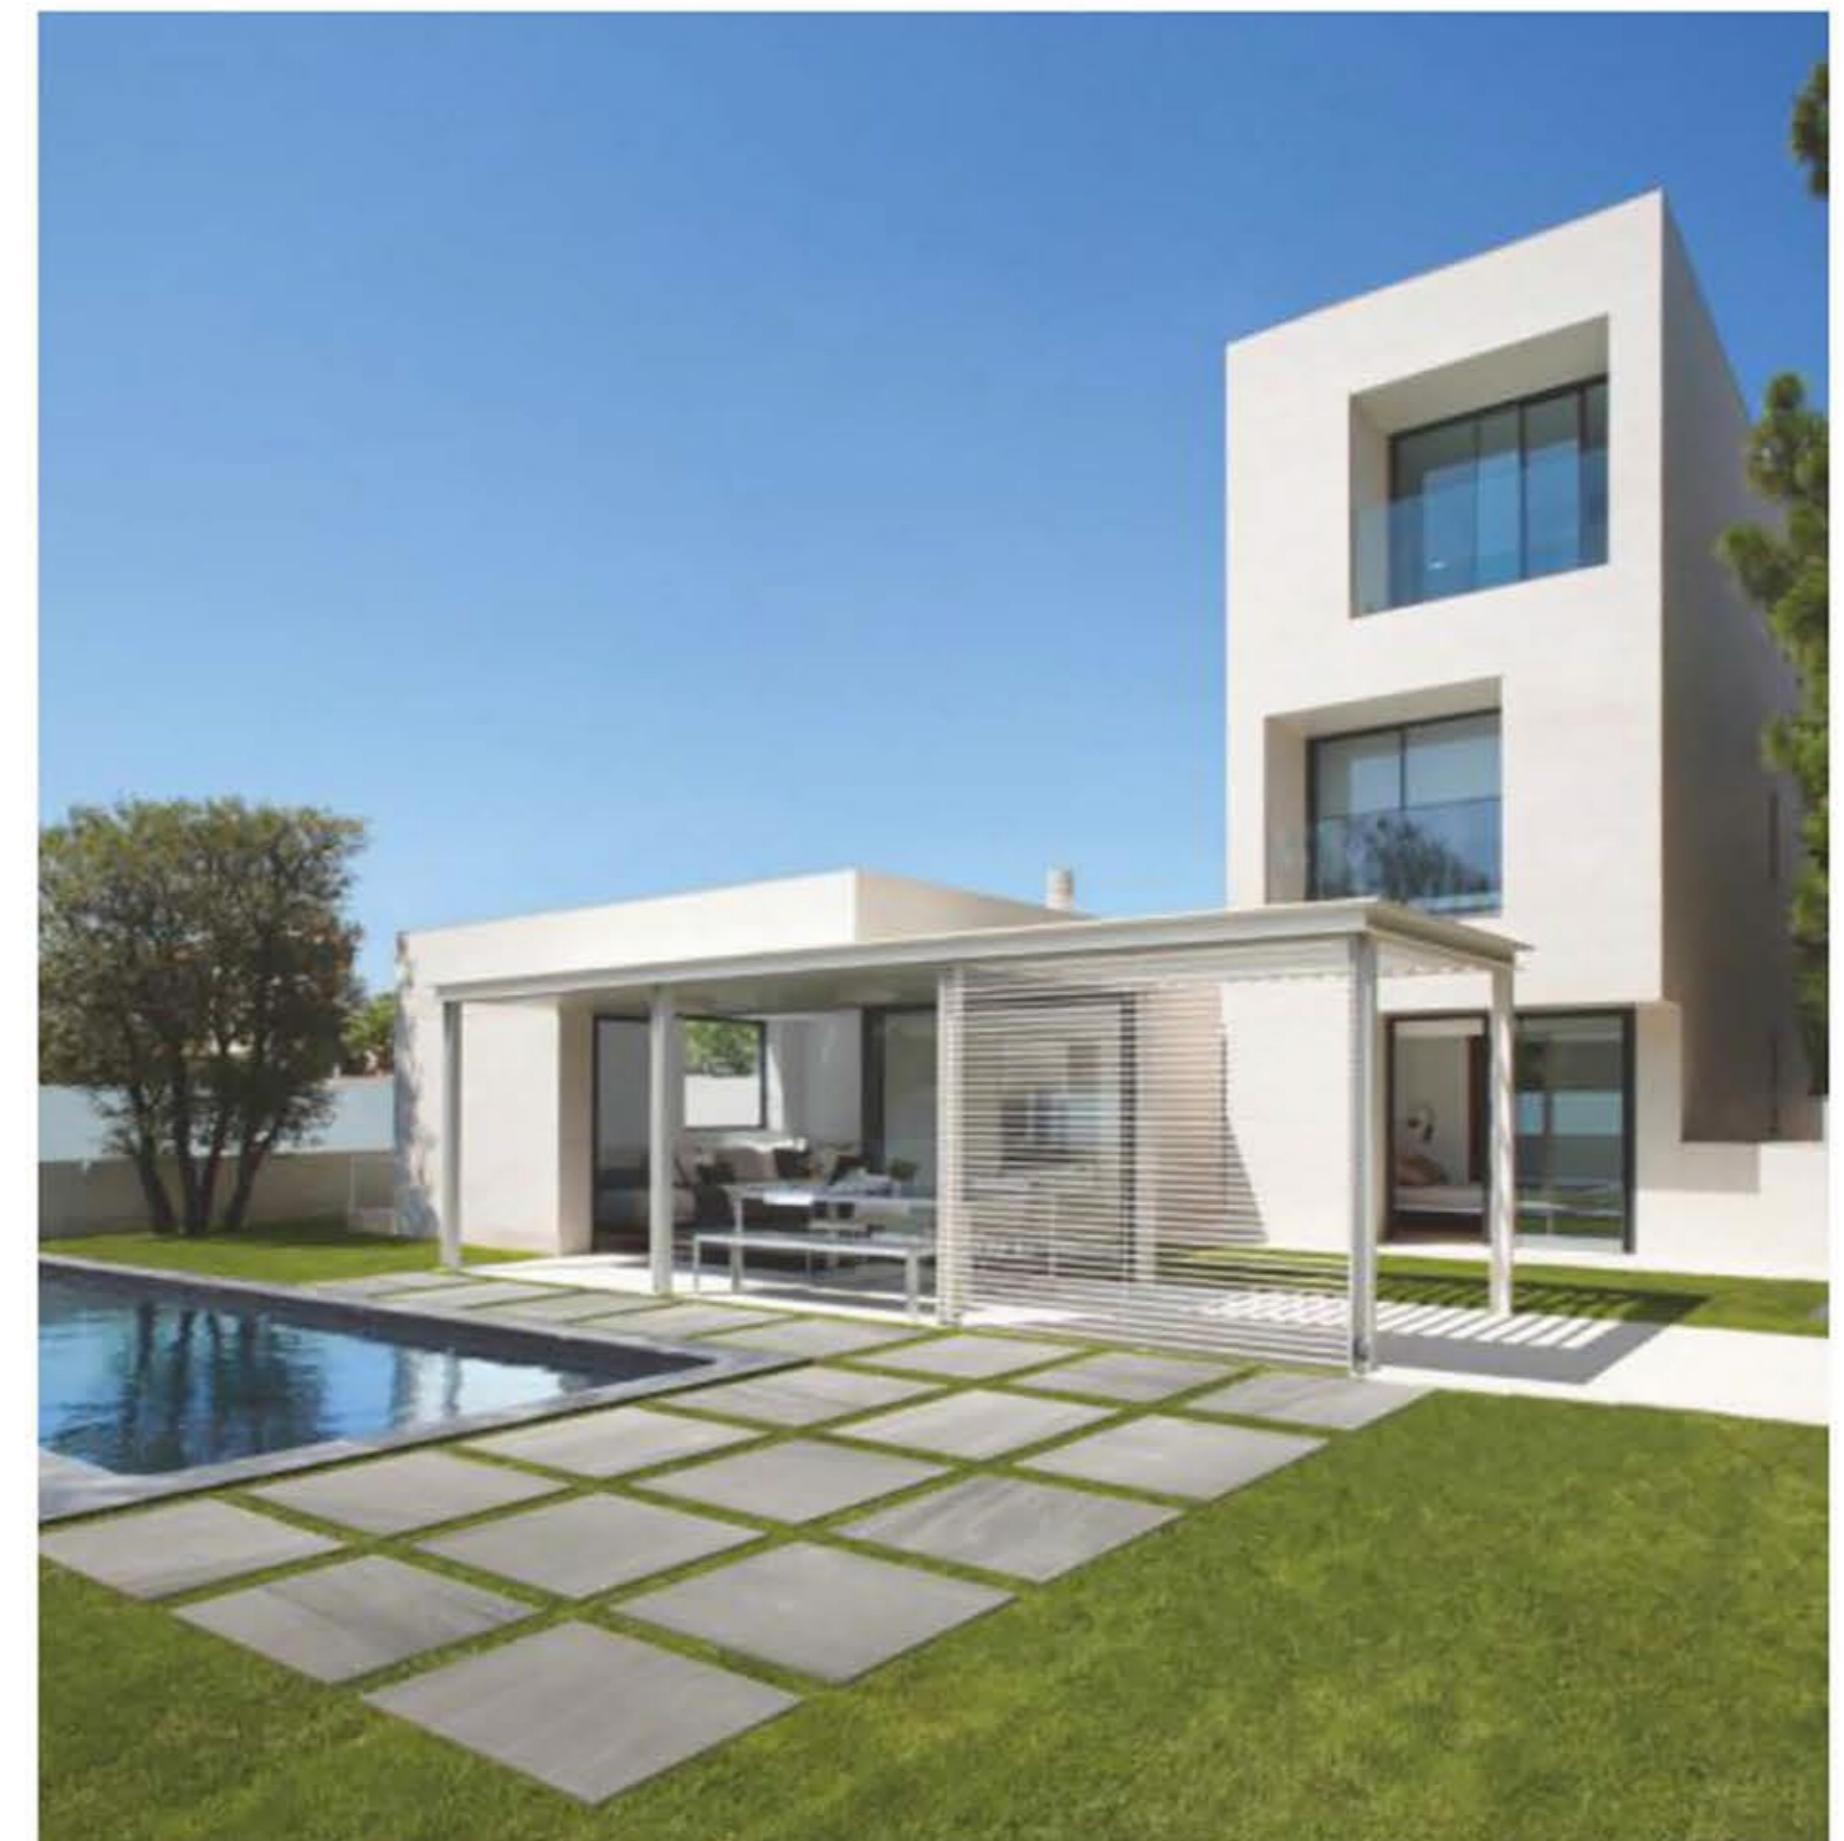

### INSTALLATION GUIDE:

Place tile on the grass and check that the gap between them is same over entire laying area.

Mark out the area of turf to be removed and dig out a depth of at least 4 inches. Create a layer of at least 3 inches of gravel (dia. 3/4"). Compact and level the gravel

Lay sand on a layer at least 1 inch thick , maintain the space between sand layer and surface of the ground to 20mm ( tile thickness). Compact and level the sand.

Put the tile in place and tap down gently with a rubber mallet to settle them in to place. Correct the unevenness if any.

20 MM

## LAYING OVER SAND

### INSTALLATION GUIDE:

Prepare a layer of sand at least 1 inch thick on existing substrate ( concrete or Gravel). Level the surface with a straightedge and check the flatness.

Place the tile on sand and use spacer to ensure an even gap between tiles in entire laying area ( minimum advisable gap is  $1/8"$  )

20 MM

## LAYING AS RAISED FLOOR

### INSTALLATION GUIDE:

Clean the existing concrete surface, ensure it is dry and cured and check the level.

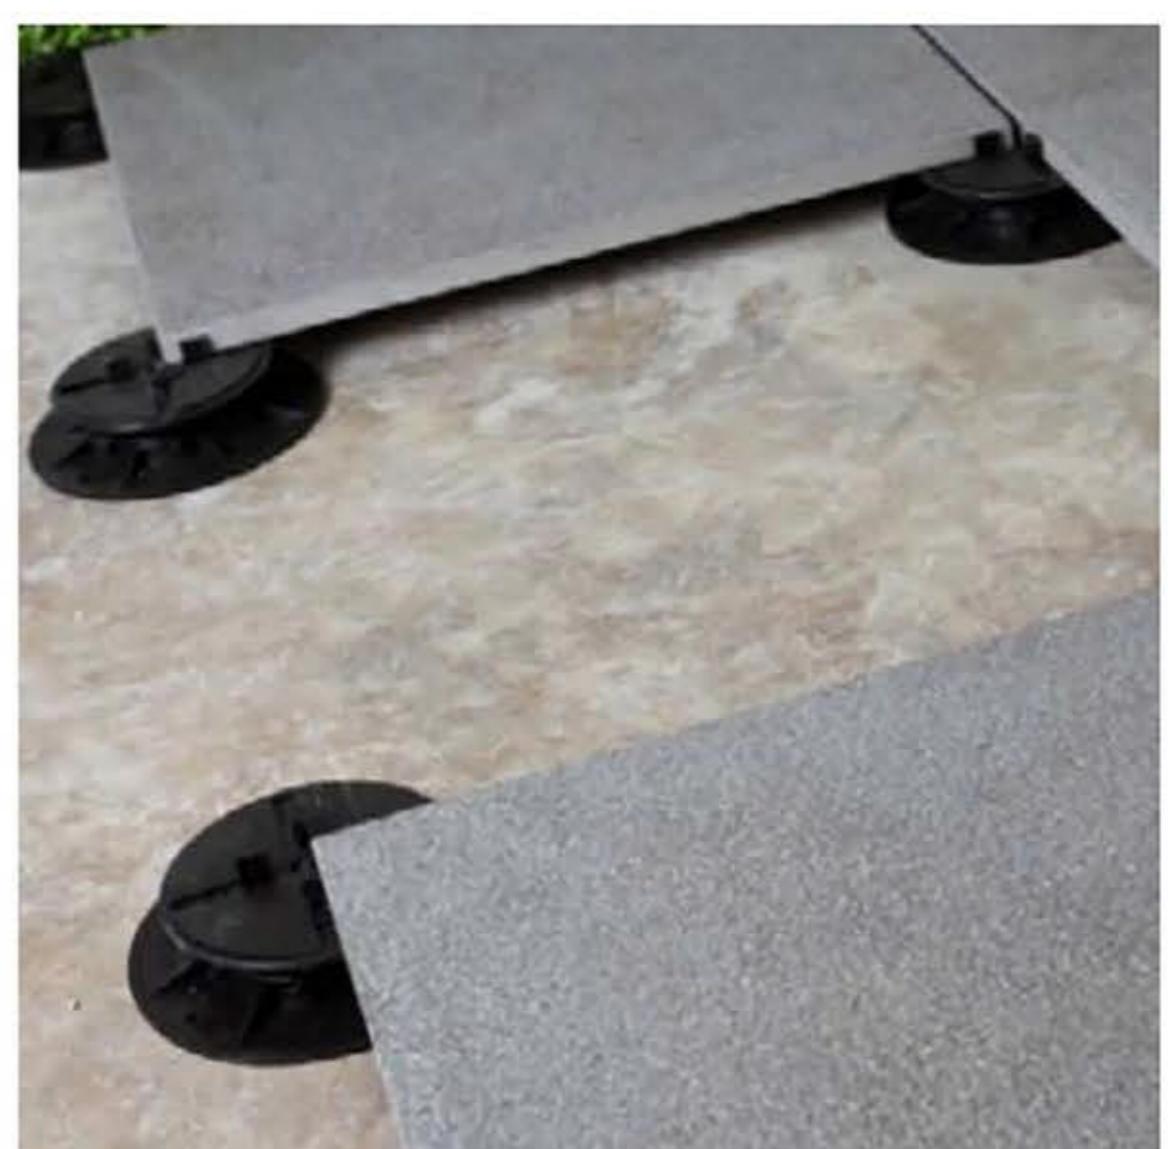

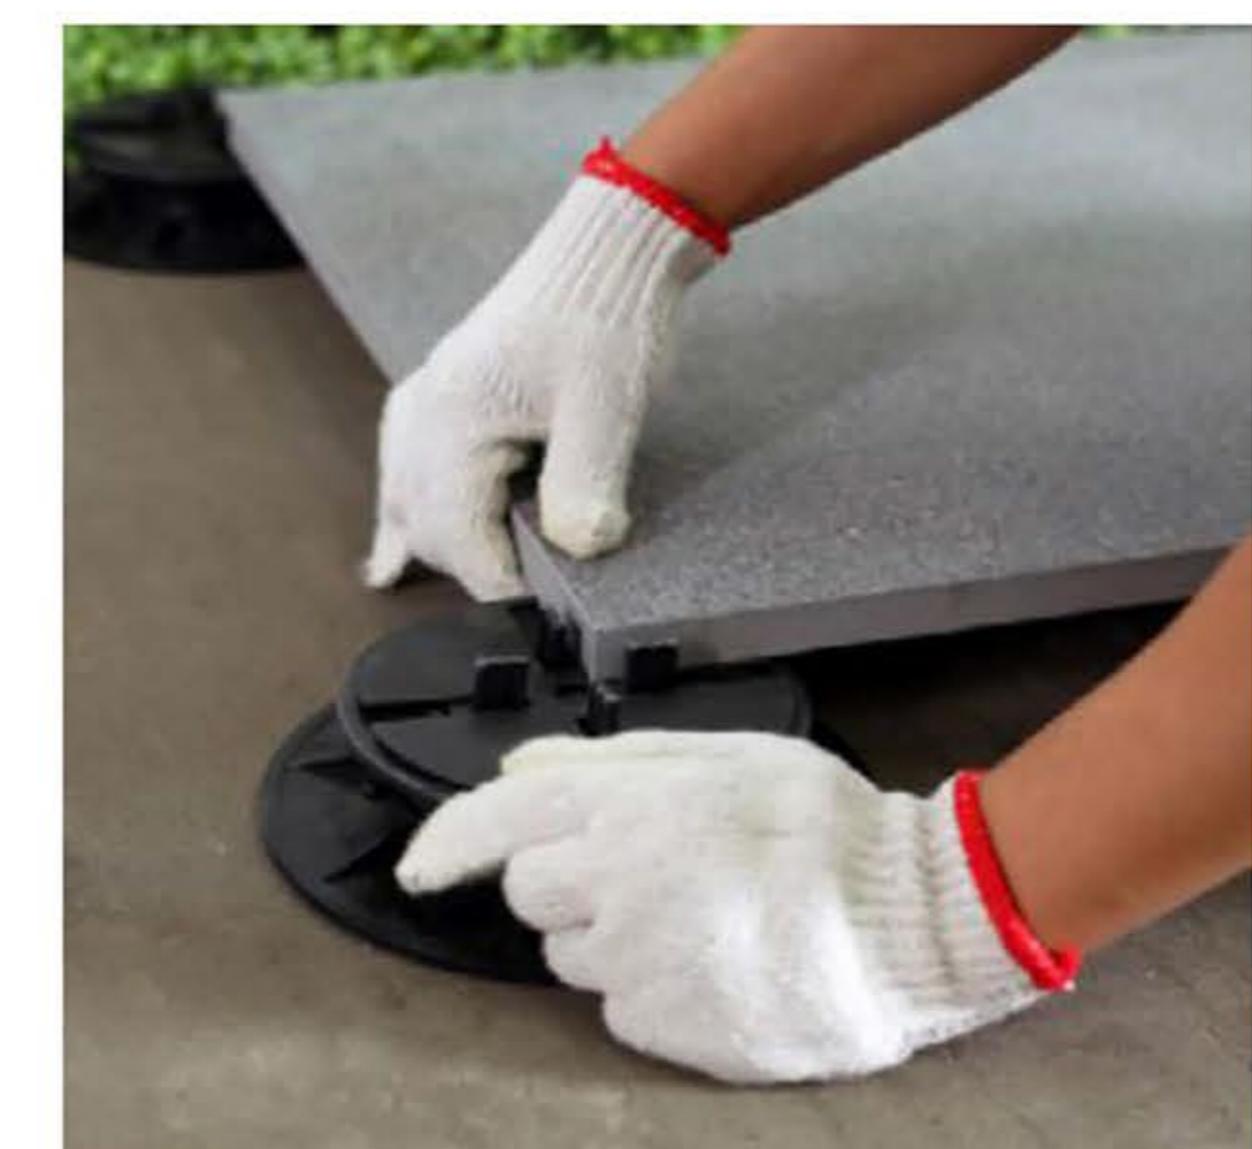

Prepare the selected pedestals, cut those which will be placed at edge of the tiles to maintain the edge line flat.

Place the pedestals on concrete floor in grid as per laying diagram firstly install the pedestals in all edges

If any wall is connected to the flooring, Fix the tile edge protective clips on the pedestals in that area.

Add 1 pedestal in middle of the tile. Remove the spacer wings from pedestal if heavy load is expected.

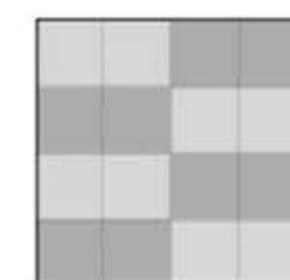

Check the level and correct it by adjusting the height of the pedestal with using adjusting key.

## Shade variation in outdoor porcelain tiles

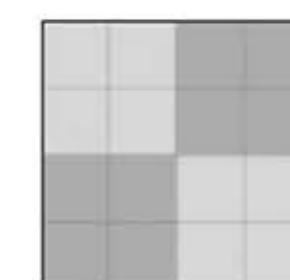

Shade variation is differences in the colour and/or surface you see with the tiles in any one collection. The differences in the shades of the single tiles can result in them looking uneven when you see them side by side, and so strong variations in shading is a plus point for collections that are inspired by natural materials, like stone, marble or wood.

### V2 – SLIGHT VARIATION

The colour of the tiles is basically uniform with some shading in similar tones. Such soft effects of light and shade on a surface do not compromise its homogeneity, whether it is the natural grain that is typical of wood or the veins of marble or texture of stone, the marks of concrete or cement-look effects.

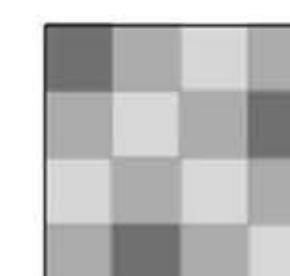

Moderate variation in shading is a value for ceramic tiles and often is closely linked to a DESIGNER looks.

### V3 – MODERATE VARIATION

The collection has moderate variation in the shades, resulting from the original grain or veins of the natural materials, or produced to show vintage effects and aged look, such effects creates balanced results that is very attractive.

As a result, we recommend taking tiles from several boxes when fitting these tiles to ensure the finished surface has the optimum degree of variability and randomness.

### V4 – SUBSTANTIAL VARIATION

The evident contrasts are used to show the natural and cultural references. luxurious combinations of wood, stone or marble with marked variability in their colour, make the effect of the strong variation in the shading very noticeable, especially with larger areas.

**Note:** Any references to colors and nature of the products given here are provided as a guideline only.

## Packing Details

	Box			Pallet			Container		
Size	Pieces	Sqm m <sup>2</sup>	Weight (Kg)	Boxes	Sqm m <sup>2</sup>	Weight (Kg)	Pallets	Boxes	Weight
