## Hexagon Series :

Our Small Hexagons should not go unnoticed when discussing the possibilities with our Hexagon tile. These little cuties offer a compact look with a big design feel.

Most often we work with clients to design their backsplash or bathroom floor. This client wanted to take it one step further and cover their entire shower with our Large Hexagon tile!

Hexagon, "...absolutely perfect in economizing labor and wax", in regard to bees choosing the shape for their honey-making. This shape is not only appreciated by its efficiency in nature, but by its elegant beauty used across artistic mediums.

The hexagon is known throughout nature as the most mathematically perfect shape because of how little waste is left behind when the shape is lined together.

## Penny - :

They're tiny but they're mighty.

Want an iridescent teal shell penny rounds out "BEAUTIFUL" in the design of your shower wall? You've got it! The possibilities are limited only by your imagination.

Penny rounds are so called because the traditional tile is the same diameter as a penny.

What better way to think "out of the box" than to GO ROUND? Penny round tiles has been popular since the Victorian era and continues reinventing itself with an even-growing list of colors and texture.

The most exquisite marbles redefined in a circular mosaic format. A contrast of concepts where nature and sophistication come together, whilst maintaining the versatility of these designs in a non-slip Matte finish, perfect for both floors and walls
